SUPPLEMENTAL ITEM

TO: MEMBERS OF THE INVESTMENT COMMITTEE

- I. SUBJECT:** Real Estate Quarterly Performance Report
as of June 30, 2008
- II. PROGRAM:** Real Estate
- III. RECOMMENDATION:** Information Only
- IV. ANALYSIS:**

The enclosed Real Estate Quarterly Performance Report for the quarter ending June 30, 2008, has been prepared by staff from the Performance Monitoring Unit with assistance from CalPERS' Real Estate Unit and Pension Consulting Alliance, Inc. (PCA). The one-year total returns (as of June 30, 2008) for the Real Estate Portfolio were -11.2% before fees and -12.6% after fees. The since inception return of the Real Estate Portfolio was 10.3% after fees, with the income component generating 6.5% and the appreciation component generating 3.9%.

V. STRATEGIC PLAN:

Goal VIII: Manage the risk and volatility of assets and liabilities to ensure sufficient funds are available, first, to pay benefits and second, to minimize and stabilize contributions.

VI. RESULTS/COSTS:

The data in the report has been gathered from sources the Performance Monitoring Unit believes to be reliable. This item provides information to the Investment Committee on the assets and performance of the fund.

Real Estate Quarterly Performance Report Disclosure

CalPERS' Performance Monitoring Unit compiles this Quarterly Performance Report (QPR) using financial information provided by real estate investment partners. CalPERS requires its investment partners to prepare and submit financial statements quarterly and to provide audited financial statements annually. CalPERS relies on the auditor's opinion regarding the financial statements. The QPR is updated to reflect the most current financial information provided by the real estate investment partner.

The financial information for real estate program performance lags one-quarter due to industry reporting cycles. Each real estate investment partner supplies its quarterly financial statements to CalPERS' Performance Monitoring Unit (PMU), for the prior quarter. The PMU reviews the financial statements and performs analytical procedures to ensure the financial reports, prepared by the partners, are consistent with prior periods and comparable with other similarly situated CalPERS real estate investment partners. Such analytical procedures include comparisons of management and incentive fees, expenses, long-term debt, and return on equity. The financial data in the QPR is reviewed consistent with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

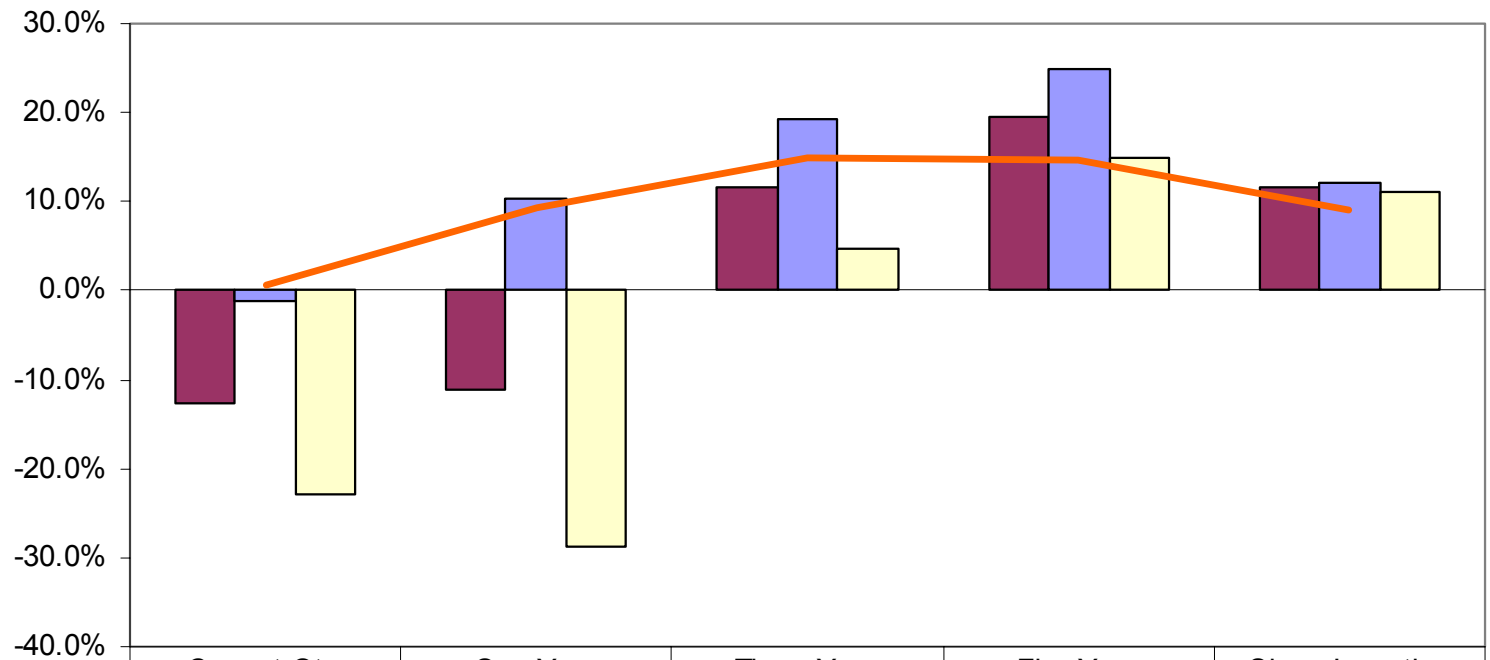

PCA Real Estate Advisors, Inc. (PCA RE) (the Board's Consultant for Real Estate), provides oversight services to PMU for the performance reporting process, and assists PMU in verifying that the investment partners' financial statement information is properly utilized to calculate the time-weighted returns presented in the QPR. PCA RE reviews and comments on the QPR in final form prior to its submission to the Investment Committee. In addition, PCA RE reviews the real estate performance returns and asset values that are provided to State Street (CalPERS' master custodian) for reporting the Total Fund's performance.

As required by the Board's Policy for Equity Real Estate Appraisal and Valuation, core real estate assets are appraised annually; non-core assets are appraised based on a risk adjusted basis. Independent real estate appraisal firms provide an unbiased and neutral opinion of asset value. All appraisals are completed in compliance with NCREIF's Real Estate Investment Standards and the Appraisal Institute's Uniform Standards of Professional Appraisal Practice. The PMU verifies that these independently appraised values are reflected in the investment partners' financial statements used to produce the QPR.

Real Estate Portfolio Performance Summary

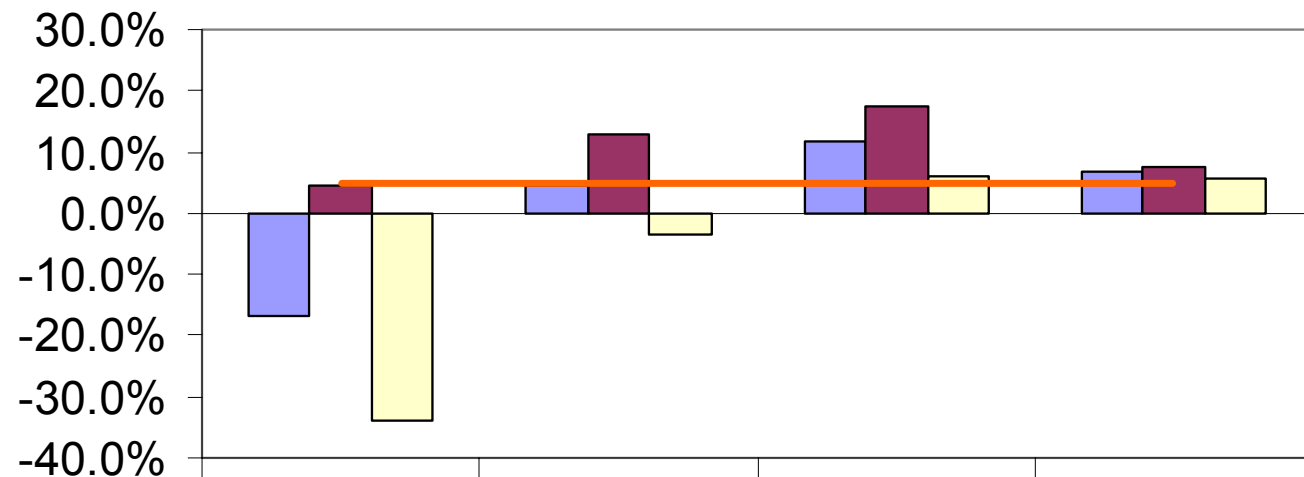

- ♦ **Total Portfolio Performance** – The one-year (as of June 30, 2008) total return for the Total Real Estate Portfolio was -11.2% before fees and -12.6% after fees. The nominal after fee total return (since inception) for the Total Real Estate Portfolio was 10.3% as of June 30, 2008, with the income component generating a 6.5% return and the appreciation component generating a 3.9% return.
- ♦ **Core Portfolio Performance** – The one-year (as of June 30, 2008) total return for the Core Portfolio was 10.4% before fees and 9.7% after fees. The nominal after fee total return (since inception) for the Core Portfolio was 11.1% as of June 30, 2008, with the income component generating a 7.4% return and the appreciation component generating a 3.7% return. The total before fee returns for the Industrial Sector, which reflect the June 30, 2008 valuations, were -4.5% for the current quarter and -2.7% for the one-year return as compared to the NCREIF Industrial Sector which reported a 0.9% current quarter return and a 8.5% one-year return.
- ♦ **Non-Core Portfolio Performance** – The one-year (as of June 30, 2008) total return for the Non-Core Portfolio was -28.8% before fees and -30.7% after fees. The nominal after fee total return (since inception) for the Non-Core Portfolio was 9.2% as of June 30, 2008, with the income component generating a 3.8% return and the appreciation component generating a 5.3% return. The Housing Program generated a -106.1% before fee return for the current quarter and a -103.3% before fee return for the one-year period. In addition, the REIT Composite generated a -9.0% before fee return for the current quarter and a -22.3% before fee return for the one-year period. The Timberland sector was transferred into the Inflation Linked Asset Class in the 4th Quarter 2007. The Non-Core portfolio includes historical Timberland returns prior to the 4th Quarter 2007, but not thereafter. (See page II-1 for additional comments regarding Non-Core Portfolio performance.)
- ♦ **Comparison to Industry Benchmark** – The Total Real Estate Portfolio outperformed the NCREIF Detailed Property Index (Index) for the five year and since inception periods, as shown in the following chart on page I - 4, titled *Total Real Estate Portfolio, Comparison to NCREIF Index, Nominal Returns, Before Fees*. In addition, the Core Portfolio outperformed the Index for all periods except the current quarter. The Non-Core Portfolio outperformed the Index for the five year and since inception periods. It should be noted that although the NCREIF Index is more directly comparable to the Core Portfolio, the Index is used as a benchmark for the Non-Core Portfolio as well.
- ♦ **Comparison to Real Rate of Return Benchmark** – Policy dictates that CalPERS' after fee real rate of return should reach 5% for the Core Portfolio and exceed 5% for the Non-Core Portfolio. The Core has exceeded the 5% real rate of return benchmark for all periods except the one year. The Non-Core and Total Portfolio exceeded the 5% real rate of return benchmark for the five year and since inception periods. All real rates of returns are shown on the chart located on page I - 5 titled *Total Real Estate Portfolio, Comparison to Real Rate of Return, Benchmark, After Fees*. (Refer to Appendix page V-22 for CPI index and Real Rate of Return calculation.)

**II. SIGNIFICANT EVENTS /
MATERIAL EXCEPTIONS TO POLICY /
CREDIT ACCOMMODATIONS**

Significant Events

Core

- The June 30, 2008 appraisals of the Industrial portfolio resulted in an unrealized before-fee quarterly return of approximately -4.5%, reflecting on-going capital markets pressure.*

Non-Core

- June 30, 2008 “Net Assets at Fair Market Value” incorporate write-downs to the March 31, 2008 appraisals of the Housing sector. Adjustments, such as deducting sales and adding capital expenditures, were made so that the March 31, 2008 appraisals rolled forward to the June 30, 2008 quarter. Due to the timing of final Housing appraisals, the Performance Monitoring Unit (PMU) utilized best efforts to incorporate fair market value. For the majority of Partners, appraisals were used. In some instances the appraisals were utilized in conjunction with business valuations to derive the fair market value of the real estate property assets.
- Change in Accounting Principle disclosure – CalPERS has changed the basis of accounting for the Housing sector from a historical cost basis to a fair market value standard. The fair market value standard currently applies to the CORE portfolio. For the June 30, 2008 quarter and for all future quarters, the Housing sector partnerships will be required to report their real estate assets at fair market value.
- The negative returns in the Housing Program were primarily driven by a combination of a slowdown in absorption/sales of new homes, and a value decline as a result of an independent appraisal process.*
- The trailing one year before-fee return of -12.9% in the Senior Housing Program was primarily driven by a slowdown in the broader housing market.*
- The Public REITs -9.0% before-fee return for the quarter was a result of concerns over the weakened outlook for global economic growth and the continued deterioration of the global financial and credit markets. Property stocks in Europe led the declines, posting a -17.0% for the quarter, while property stocks in Asia and the U.S. declined 7.7% and 4.9%, respectively.*

Material Exceptions to Policy*

- CalPERS' Core asset exposure in the Midwest region was approximately 32.97 percent as of June 30, 2008, or 7.97 percent above the upper policy range of 10-25 percent. The Midwest Region is composed of two NCREIF divisions (West/North Central and East/North Central). The Core asset exposure in the South Region was approximately 9.13 percent as of June 30, 2008, or 5.87 percent below the lower policy range of 15-30 percent. The South Region is composed of two NCREIF divisions (Southwest and Southeast). These percentages will continue to adjust as Staff makes additional portfolio sales or purchases to bring the Core Portfolio within policy range.

*Note – Data reflected in this section has been provided by the Real Estate Unit for informational purposes. It has not been independently verified by the Performance Monitoring Unit.

Total Permitted Amount of Credit Accommodations (e.g. Guarantees) in Real Estate is \$5,926,472,291. This figure represents the total amount that may be allocated to the partnerships but does not represent the current allocated amount. The Total Permitted Amount of Credit Accommodations is derived by multiplying the CalPERS total fund \$237,058,891,656 (as of 7/3/08) by the 10% real estate target allocation and subsequently multiplying the resulting figure by the maximum allowable guarantee of 25%.

*Note – Data reflected in this section has been provided by the Real Estate Unit for informational purposes. These amounts are not reflected in the Net Assets at Fair Market Value and are not taken into account when calculating the performance figures. These figures have not been independently verified by the Performance Monitoring Unit.

¹ The decrease in net assets for the Housing sector from \$2.4 Billion as of March 31, 2008 to \$581 million as of June 30, 2008 is due to the net effect of 2 events/factors: (1) \$3.1 Billion in write-downs taken by several Housing partnerships to reflect March 31, 2008 CALPERS appraisal values (see page II-1 for additional information) and (2) \$1.3 Billion in net Capital Contributions into the Housing sector for the primary purpose of paying off debt.

² The high negative returns of less than negative 100% for the Housing sector were due to the fact that the cumulative amount of the write-downs taken by the various Housing partnerships in June 30, 2008 was \$3.1 Billion which exceeded the \$2.4 Billion net assets of the Housing sector as of March 31, 2008 (see also footnote #1 above for further explanation).

³ Less than 0.1% of the Non-Core Portfolio.

⁶ Not meaningful and/or high negative return(s) are due to large realized and/or unrealized loss.

⁷ Return(s) are high due to realized and/or unrealized appreciation.

⁸ The beginning NAV for the third and fourth quarters of 2003 became negative, which is the cause of the not meaningful returns.

⁹ High negative and not meaningful 3 year, 5 year, and since inception returns are due to a material year-end audit impairment write-down of several projects in IHP V in the fourth quarter of 2006. The 1 year high negative return is due to realized and/or unrealized loss.

¹⁰ The high negative current quarter return of less than -1000% as well as the N/M returns were due to a \$1.5 Billion write down taken by MW III in June 30, 2008. See pages II-1 & III-1 for further explanation.

¹¹ Return(s) stated as "N/M" are not meaningful due to negative net investment income relative to a negative NAV. Negative return(s) are due to large realized and/or unrealized loss. This negative NII or NAV may have occurred in a prior quarter.

¹² Return(s) stated as "N/M" are not meaningful due to negative net investment income relative to a negative NAV. This negative NII or NAV may have occurred in a prior quarter.

¹³ High negative and/or not meaningful return(s) are due to large negative net investment income.

²³ Less than 0.1% of the Non-Core Portfolio.

²⁹ Not meaningful and/or negative return(s) are due to large realized and/or unrealized loss.

³⁰ Return(s) are high due to realized and/or unrealized appreciation.

³¹ The beginning NAV for the third and fourth quarters of 2003 became negative, which is the cause of the not meaningful returns.

³² High negative and not meaningful 3 year, 5 year, and since inception returns are due to a material year-end audit impairment write-down of several projects in IHP V in the fourth quarter of 2006. The 1 year high negative return is due to realized and/or unrealized loss.

³³ Negative investment management fee and/or negative incentive fee causes after fee returns to be higher than the before fee returns.

³⁴ The high negative current quarter return of less than -1000% as well as the N/M returns were due to a \$1.5 Billion write down taken by MW III in June 30, 2008. See pages II-1 & III-2 for further explanation.

³⁵ Return(s) stated as "N/M" are not meaningful due to negative net investment income relative to a negative NAV. Negative return(s) are due to large realized and/or unrealized loss. This negative NII or NAV may have occurred in a prior quarter.

³⁶ Return(s) stated as "N/M" are not meaningful due to negative net investment income relative to a negative NAV. This negative NII or NAV may have occurred in a prior quarter.

³⁷ High negative and/or not meaningful return(s) are due to large negative net investment income.

PERFORMANCE MEASUREMENT GLOSSARY

GLOSSARY

Annualized – When returns for a period other than one year are put on an annual basis. For example, an individual quarter return would be annualized as follows:

$$[(1 + \text{Quarter Return})^4] - 1 = \text{Annualized Return}$$

Appreciation Return – Expressed as a percentage, the change in market value over the period of analysis. The appreciation return is computed as follows:

$$\left[\frac{\text{Realized} + \text{Unrealized Gain or Loss}}{\text{Beginning Net Assets} + \text{Time-Weighted Contributions} - \text{Time-Weighted Distributions}} \right] \times 100$$

For assets which continue to be held, the appreciation is unrealized. When assets are sold, the appreciation is realized.

Capitalization Rate – Any rate used to convert income into value. Value conversion formula is as follows:

$$\text{Net Operating Income} / \text{Capitalization Rate} = \text{Real Estate Value}$$

Compounding – Returns are geometrically compounded on a quarterly basis. For example, the annual return for four quarters would be:

$$(1 + Q1)(1 + Q2)(1 + Q3)(1 + Q4) = (1 + \text{Annual Return})$$

Credit Accommodation – The term generally refers to a guaranty executed by CalPERS whereby CalPERS agrees to pay the debt obligation of an entity, in the event the entity fails to pay the debt obligation. The entity will usually be a limited partnership or limited liability company, and will be majority-owned by CalPERS. The debt obligation that CalPERS guarantees will be evidenced by an extension of credit (e.g., loan, line of credit, or other form of credit facility) by a financial institution to the entity. The benefit provided to CalPERS is that the guaranty will tend to lower the borrowing cost for the entity and should, in turn, enhance the overall return to the real estate investment. Guarantees become a contingent liability on the CalPERS' overall balance sheet and should be used only when they provide economic benefit. Credit accommodation differs from credit enhancement in that a credit accommodation is not rated and does not use CalPERS' Credit Enhancement Program (CEP) rating (either implied or explicitly). In addition, Credit Accommodation is made for an entity in which CalPERS has an existing, or proposed, ownership interest. Credit enhancement is the use of CalPERS' balance sheet, through the program rating, in which CalPERS has no initial ownership interest and where CalPERS receives explicit consideration for the enhancement.

GLOSSARY

Discount Rate – A yield rate used to convert future payments or receipts into present value.

Internal Rate of Return (IRR) – Dollar weighted rate of return that shows profitability as a percentage, showing the return on each dollar invested. IRR equates the present value of a partnership's estimated cash flows (CF) with the present value of the partnership's costs. Before fees (BF) IRR is calculated before all expensed fees such as Asset Management, Disposition, Incentive Fees, etc. After fees (AF) IRR is calculated after all expensed fees such as Asset Management, Disposition, Incentive Fees, etc. Please note, IRR for CalPERS reporting purposes is calculated for sold/realized projects only.

IRR is the quarterly discount rate that makes the following relationship hold:

$$\text{Present Value (inflows)} = \text{Present Value (investment costs)}$$

IRR is computed as follows:

$$CF_0 + CF_1 / (1+IRR) + CF_2 / (1+IRR)^2 + CF_3 / (1+IRR)^3 \dots CF_n / (1+IRR)^n = 0$$

Investment Fees – Generally include acquisition, asset management and disposition fees paid to third party firms. Acquisition and disposition fees are calculated on a per transaction basis and range from 0 to .85 percent and 0 to .60 percent, respectively, on a graduated scale. Asset management fees are based on asset value and range from .25 to .65 percent on a graduated scale.

J-Curve Effect – Refers to the shape of a plotted trendline depicting investment returns produced from the common practice of paying management fees and start-up costs out of the first draw on committed capital. As a result, a fund will initially show a negative return. When the first realizations are made, the fund returns start to rise steeply. After about three to five years, the interim return will give a reasonable indication of the definitive return.

Market Value – An opinion of value as of a certain date as stated by either the investment advisor or independent appraiser. Market value differs from amount funded or net investment in that the value includes unrealized potential gains or losses during the holding period.

Net Assets (Market Value) – Total assets minus liabilities based on market value.

Net Income Return – Expressed as a percentage, net income accrued divided by beginning net assets adjusted for time-weighted contributions and distributions. The net income return is computed as follows:

$$\left[\frac{\text{Net Investment Income}}{\text{Beginning Net Assets} + \text{Time-Weighted Contributions} - \text{Time-Weighted Distributions}} \right] \times 100$$

GLOSSARY

Net Investment Income – The amount of net income that has accrued for the period, net of advisor fees.

Nominal Returns – Nominal returns are unadjusted for inflation.

Property Type – Eleven property type categories are used throughout the report. A property is placed into a category based on its primary use, unless otherwise designated as a mixed-use property.

Realized Gain or Loss – The gain or loss CalPERS realized from the disposition of a real estate asset. The computation is as follows:

$$\text{Proceeds from Investments Sold} - \text{Cost of Investments Sold} - \text{Recognized Prior Period Appreciation on Investments} = \text{Realized Gain or Loss}$$

Real Estate Investment Trust (REIT) – Similar to a mutual fund, a REIT is a corporation or trust that combines the capital of many investors to acquire or provide financing for all forms of real estate.

Real Estate Investment Value – The sum of components of real estate investments at fair value. REIV is computed as follows:

$$(\text{Equity} + \text{Capital Expenditures}) + \text{Mortgages Receivable} + \text{Debt/Equity}$$

Real Returns – Nominal returns adjusted for inflation as follows:

$$\left[\frac{1 + \text{Nominal Return}}{1 + \text{Inflation}} \right] = 1 + \text{Real Return}$$

The Consumer Price Index – Urban (CPI-U) is used for the inflation factor.

GLOSSARY

Time-Weighted Contributions – The amount of capital CalPERS contributes to a property/investment during a quarter adjusted for the amount of days left in the quarter at the time of the transaction. The computation is as follows:

$$\left[\frac{(\text{Contrib.1} \times \text{Days to End of Quarter}) + (\text{Contrib.2} \times \text{Days to End of Quarter}) + (...)}{\text{Days in Quarter}} \right]$$

Time-Weighted Distributions – The amount of cash received by CalPERS from a property/investment during the quarter adjusted for the amount of days left in the quarter at the time of the transaction. The computation is as follows:

$$\left[\frac{(\text{Distrib.1} \times \text{Days to End of Quarter}) + (\text{Distrib.2} \times \text{Days to End of Quarter}) + (...)}{\text{Days in Quarter}} \right]$$

Total Net Return – The sum of the net income return and the appreciation return.

Unrealized Gain or Loss – The change in market value of a real estate asset over the period of analysis adjusted for several factors. The computation is as follows:

$$\left[\begin{aligned} &\text{Ending Real Estate Investment Value} - \text{Beginning Real Estate Investment Value} - \\ &\text{Capital Expenditures/New Acquisitions} - \text{Change in Joint Venture Costs} - \\ &\text{Mortgages Funded} + \text{Principal Payments Received} + \text{Cost of Assets Sold} \end{aligned} \right]$$

A. INFLATION LINKED ASSET CLASS QUARTERLY PERFORMANCE REPORT DISCLOSURE

CalPERS' Performance Monitoring Unit (PMU) compiles this Quarterly Performance Report (QPR) using financial information from two separate sources. For the Commodities and Inflation Linked Bonds portfolios, the PMU obtains the performance numbers from State Street Bank. For the Infrastructure and Forestland portfolios, the PMU utilizes financial information provided directly by the investment partners to calculate the performance numbers that are published in the QPR. For the Infrastructure and Forestland portfolios, CalPERS requires its investment partners to prepare and submit financial statements quarterly and to provide audited financial statements annually. CalPERS relies on the auditor's opinion regarding the financial statements. The QPR is updated to reflect the most current financial information provided by the investment partner.

The financial information for the Infrastructure and Forestland portfolios' performance lags one-quarter due to industry reporting cycles. For the Infrastructure and Forestland portfolios, each investment partner supplies its quarterly financial statements to CalPERS' Performance Monitoring Unit, for the prior quarter. The PMU reviews the financial statements and performs analytical procedures to ensure the financial reports, prepared by the partners, are consistent with prior periods and comparable with other similarly situated CalPERS investment partners. Such analytical procedures include comparisons of management and incentive fees, expenses, long-term debt, and return on equity. The financial data in the QPR is reviewed consistent with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

Infrastructure and Forestland portfolio assets are appraised using the same procedures as Real Estate assets. Independent real estate appraisal firms provide an unbiased and neutral opinion of asset value. All appraisals are completed in compliance with the Appraisal Institute's Uniform Standards of Professional Appraisal Practice. The PMU verifies that these independently appraised values are reflected in the investment partners' financial statements used to produce the QPR.

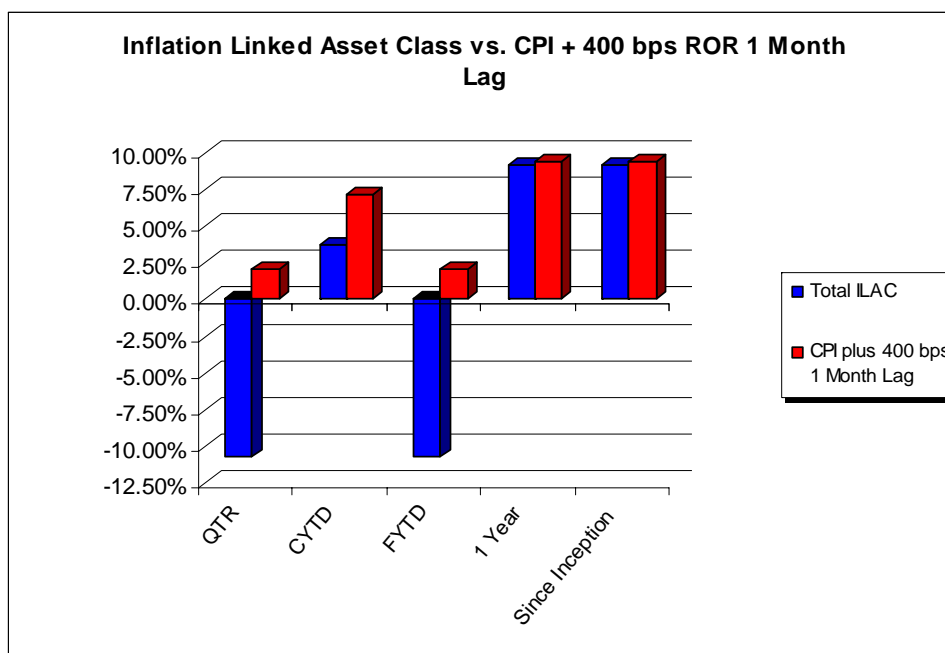

B. TOTAL INFLATION LINKED ASSET CLASS REVIEW

Background

In September 2007, the Investment Committee approved an Inflation Linked Asset Class (ILAC) Pilot Program comprised of Commodities, Inflation Linked Bonds, Infrastructure and Forestland, as well as the reclassification of existing investments into the ILAC. In December 2007, the Investment Committee adopted an asset allocation policy establishing the ILAC allocation target of up to 5%. In February 2008 the Investment Committee adopted the overall asset class policy and the policies for Commodities, Inflation Linked Bonds, and Forestland. In August 2008 the Investment Committee adopted the policy for Infrastructure. All assets of the ILAC are under the direct or delegated investment management of the Senior Investment Officer, Asset Allocation/Risk Management.

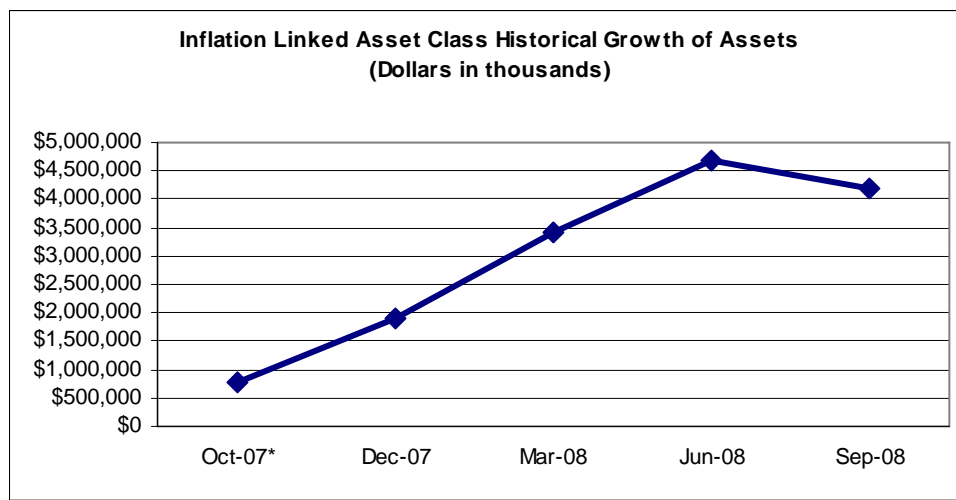

Total Asset Class Performance Review

ILAC generated a Total Return of -10.74% for the quarter ended September 30, 2008. ILAC's return under performed its policy benchmark by 1283 basis points. The returns shown in the chart below are not annualized.

ILAC Historical Growth of Assets

ILAC assets are valued at \$4.2 billion from its initial investment of \$765 million.

- ¹ Infrastructure and Forestland returns are lagged one quarter. Therefore, the September 30, 2008 returns represent returns as of June 30, 2008.
- ² Time weighted returns are calculated based on the inception date of October 1, 2007 which represents the inception date of the Inflation Linked Asset Class.
- ³ Internal Rates of Return (IRRs) are calculated from the since inception date of the partnership. The partnerships' since inception date may precede the ILAC inception date of October 1, 2007.
- ⁴ In accordance with Global Investment Performance Standards (GIPS), this column shows Since Inception returns not annualized for periods less than 1 year.
- ⁵ Since Inception returns annualized are provided as supplemental information. While GIPS does not recommend annualizing since inception returns, this information may be useful as a supplemental tool for forecasting and other analytical purposes.
- ⁶ Current quarter and Since Inception returns are "N/M" not meaningful due to negative net investment income relative to a negative NAV.
- ⁷ IRR is not meaningful due to negative terminal value.

F. FORESTLAND PORTFOLIO DESCRIPTION

The Forestland advisors/investments have varying investment mandates established by CalPERS and include the following:

- ◆ ***Sylvanus, LLC*** - CalPERS invests in approximately 54,554 acres of tree farms in Brazil and 35,271 acres in the New South Wales province of Australia through a co-investment partnership.
- ◆ ***Great Eastern Timber Co. LLC (GETCO)*** – GETCO is a limited liability company organized on January 31, 2000 to invest in timberland properties located in the northeastern and southern United States of America. As of March 31, 2008, CALPERS' Capital balance (based on a 98.13% ownership) was \$208,424 out of a total Capital balance of \$212,396 for GETCO. On December 29, 2004, the last timberland investment was sold. GETCO will terminate in 2011 unless terminated sooner in accordance with the terms of the Operating Agreement.
- ◆ ***Lincoln Timber, L.P.*** – The partnership was formed on October 26, 2007 for the purpose of investing in timberland in the United States. The partnership currently owns indirect ownership in timberlands in Texas, Louisiana, Georgia and Alabama through the Campbell Opportunity Fund A, LP. The fund is managed by The Campbell Group and CalPERS' capital commitment is \$1.25 billion with an approximate 72% share of total equity.

G. PERFORMANCE MEASUREMENT GLOSSARY

Annualized Time-Weighted Return – When returns for a period other than one year are put on an annual basis. For example, an individual quarter return would be annualized as follows:

$$[(1 + \text{Quarter Return})^4] - 1 = \text{Annualized Return}$$

Appreciation Component of Time-Weighted Return (Infrastructure and Forestland) – Expressed as a percentage, the change in market value over the period of analysis. The appreciation return is computed as follows:

$$\left[\frac{\text{Realized} + \text{Unrealized Gain or Loss}}{\text{Beginning Net Assets} + \text{Time-Weighted Contributions} - \text{Time-Weighted Distributions}} \right] \times 100$$

For assets which continue to be held, the appreciation is unrealized. When assets are sold, the appreciation is realized.

Compounding (Linking) of Time-Weighted Returns – Returns are geometrically compounded (linked) on a quarterly basis. For example, the annual return for four quarters would be:

$$(1 + Q1)(1 + Q2)(1 + Q3)(1 + Q4) = (1 + \text{Annual Return})$$

Internal Rate of Return (IRR) – Dollar weighted rate of return that shows profitability as a percentage, showing the return on each dollar invested. IRR equates the present value of a partnership's estimated cash flows (CF) with the present value of the partnership's costs. After fees (AF) IRR is calculated after all expensed fees such as Asset Management, Disposition, Incentive Fees, etc. Please note, for CALPERS reporting purposes, it is assumed that Partnership Contributions (outflows from CALPERS) and Distributions (inflows into CALPERS) represent net amounts, after all fees have been accounted for.

IRR is the quarterly discount rate that makes the following relationship hold:

$$\text{Present Value (inflows)} = \text{Present Value (investment costs)}$$

IRR is computed as follows:

$$CF_0 + CF_1 / (1 + \text{IRR}) + CF_2 / (1 + \text{IRR})^2 + CF_3 / (1 + \text{IRR})^3 \dots CF_n / (1 + \text{IRR})^n = 0$$

Investment Fees – Generally include acquisition, asset management and disposition fees paid to third party firms. Acquisition and disposition fees are calculated on a per transaction basis and range from 0 to .85 percent and 0 to .60 percent, respectively, on a graduated scale. Asset management fees are based on asset value and range from .25 to .65 percent on a graduated scale.

J-Curve Effect – Refers to the shape of a plotted trendline depicting investment returns produced from the common practice of paying management fees and start-up costs out of the first draw on committed capital. As a result, a fund will initially show a negative return. When the first realizations are made, the fund returns start to rise steeply. After about three to five years, the interim return will give a reasonable indication of the definitive return.

Market Value – The current listed price at which investors buy or sell securities at a given time.

Market Value (Infrastructure and Forestland) – An opinion of value as of a certain date as stated by either the investment advisor or independent appraiser. Market value differs from amount funded or net investment in that the value includes unrealized potential gains or losses during the holding period. Real Estate Market Value is synonymous with **Net Assets at Fair Market Value** (see below).

Net Assets at Fair Market Value – Total assets minus liabilities based on market value. See also **Market Value (Infrastructure and Forestland)**.

Net Income Component of Time-Weighted Return – Expressed as a percentage, net income accrued divided by beginning net assets adjusted for time-weighted contributions and distributions. The net income return is computed as follows:

$$\left[\frac{\text{Net Investment Income}}{\text{Beginning Net Assets} + \text{Time-Weighted Contributions} - \text{Time-Weighted Distributions}} \right] \times 100$$

Net Investment Income – The amount of net income that has accrued for the period, net of advisor fees.

Nominal Returns – Nominal returns are unadjusted for inflation.

Real Returns – Nominal returns adjusted for inflation as follows:

$$\left[\frac{1 + \text{Nominal Return}}{1 + \text{Inflation}} \right] = 1 + \text{Real Return}$$

The Consumer Price Index – Urban (CPI-U) is used for the inflation factor.

Time-Weighted Contributions – The amount of capital CalPERS contributes to a property/investment during a quarter adjusted for the amount of days left in the quarter at the time of the transaction. The computation is as follows:

$$\left[\frac{(\text{Contrib.1} \times \text{Days to End of Quarter}) + (\text{Contrib.2} \times \text{Days to End of Quarter}) + (...)}{\text{Days in Quarter}} \right]$$

Time-Weighted Distributions – The amount of cash received by CalPERS from a property/investment during the quarter adjusted for the amount of days left in the quarter at the time of the transaction. The computation is as follows:

$$\left[\frac{(\text{Distrib.1} \times \text{Days to End of Quarter}) + (\text{Distrib.2} \times \text{Days to End of Quarter}) + (...)}{\text{Days in Quarter}} \right]$$

Time-Weighted Return (Commodities and Inflation Linked Bonds) – Also known as a Holding Period Return. It is calculated as follows:

$$\text{TWR} = \frac{\text{Ending Market Value} - \text{Beginning Market Value} - \text{Net Cash Flow}}{\text{Beginning Market Value}} \times 100$$

Also see definitions for **Annualized Time-Weighted Return** and **Compounding (Linking) of Time-Weighted Returns**.

Time-Weighted Return (Infrastructure and Forestland) – The sum of the net income return and the appreciation return. It is calculated as follows:

$$\text{TWR} = \frac{\text{Realized} + \text{Unrealized Gain/Loss} + \text{Net Investment Income Gain/Loss}}{\text{Beginning Net Assets} + \text{Time-Weighted Contributions} - \text{Time-Weighted Distributions}} \times 100$$
